Position-Force Adaptive Control for Construction Robots, with Miroslaw J. Skibniewski, AS Apr. 93, p167-185

Zimmerman, David C.
Structure/Control Synthesis with Nonnegligible Actuator Mass, AS Jan. 93, p76-89

SUBJECT INDEX

Active control

Structure/Control Synthesis with Nonnegligible Actuator Mass, David C. Zimmerman, AS Jan. 93, p76-89.

Adaptive systems

Position-Force Adaptive Control for Construction Robots, Y. Zhou and Miroslaw J. Skibniewski, AS Apr. 93, p167-185.

Aerodynamics

Delamination Effect on Flutter of Homogeneous Laminated Plates, Le-Chung Shiau, AS July 93, p284-298.

Multiple-Zone Potential Solution around Wing-Body Configurations, M. M. Alishahi and M. Darbandi, AS Oct. 93, p329-346.

Aeroelasticity

Structural Response of 34-m Darrieus Rotor to Turbulent Winds, D. J. Malcolm, AS Jan. 93, p55-75.

Aerospace engineering

Probabilistic Material Degradation Under High Temperature, Fatigue, and Creep, L. Boyce, AS Oct. 93, p347-362.

Aircraft

Multiple-Zone Potential Solution around Wing-Body Configurations, M. M. Alishahi and M. Darbandi, AS Oct. 93, p329-346.

System Flexibility and Reflected Pressures, Avinash C. Singhal, Kevin S. Fansler and Mostafa Toossi, AS July 93, p299-313.

Algorithms

Integrated Genetic Algorithm for Optimization of Space Structures, Hojjat Adeli and Nai-Tsang Cheng, AS Oct. 93, p315-328.

Antennas

Statistical Sensitivity Analysis of Lattice Space Structures, Hiroshi Furuya, AS July 93, p236-248.

Technology Assessment and Development of Large Deployable Antennas, C. A. Rogers, W. L. Stutzman, T. G. Campbell and J. M. Hedgepeth, AS Jan. 93, p34-54.

Artificial intelligence

Cognitive Force Control of Excavators, P. K. Vähä and M. J. Skibniewski, AS Apr. 93, p159-166.

Attitudes

Structural and Orbital Conditions on Response of Large Space Structures, Ramesh B. Malla, AS Apr. 93, p115-132.

Automation

Cognitive Force Control of Excavators, P. K. Vähä and M. J. Skibniewski, AS Apr. 93, p159-166.

Dynamic Model of Excavator, P. K. Vähä and M. J. Skibniewski, AS Apr. 93, p148-158.

Position-Force Adaptive Control for Construction Robots, Y. Zhou and Miroslaw J. Skibniewski, AS Apr. 93, p167-185.

Prototype Robotic Masonry System, Frank Altobelli, Henry F. Taylor and Leonhard E. Bernold, AS Jan. 93, p19-33.

Axial loads

Observations on Higher-Order Beam Theory, A. Bhimaraddi and K. Chandrashekhara, AS Oct. 93, p408-413.

Axisymmetry

Thermal Stresses in Spherical Shells, Jianping Pei and Issam E. Harik, AS Jan. 93, p106-110.

Beams

Observations on Higher-Order Beam Theory, A. Bhimaraddi and K. Chandrashekhara, AS Oct. 93, p408-413.

Bending

Effect of Localized Bending at Through-Flaws in Pressurized Composite Cylinders, Kevin J. Saeger and Paul A. Lagace, AS Oct. 93, p381-393.

Thermal Stresses in Spherical Shells, Jianping Pei and Issam E. Harik, AS Jan. 93, p106-110.

Biaxial loads

Optimal Hybridization of Symmetric, Cross-Ply Laminates Against Buckling, Sarp Adali and Kevin J. Duffy, AS Oct. 93, p394-406.

Blast loads

System Flexibility and Reflected Pressures, Avinash C. Singhal, Kevin S. Fansler and Mostafa Toossi, AS July 93, p299-313.

Bonding strength

Prototype Robotic Masonry System, Frank Altobelli, Henry F. Taylor and Leonhard E. Bernold, AS Jan. 93, p19-33.

Buckling

Optimal Hybridization of Symmetric, Cross-Ply Laminates Against Buckling, Sarp Adali and Kevin J. Duffy, AS Oct. 93, p394-406.

Collapse load

Stability and Strength of Rigid and Semirigid Plane Frameworks, Salah E. Mohamed and George J. Simitses, AS Apr. 93, p186-198.

Composite materials

Damage Detection in Composite Materials Using Identification Techniques, F. J. Soeiro and P. Hajela, AS Oct. 93, p363-380.

Delamination Characteristics around Hole in Laminates with Softening Strip, D. K. Shah and W. S. Chan, AS Apr. 93, p199-215.

Improved Method for Determining Interfacial Stresses in Composites, Ai-Kah Soh, AS Jan. 93, p90-103.

Composite structures

Effect of Localized Bending at Through-Flaws in Pressurized Composite Cylinders, Kevin J. Saeger and Paul A. Lagace, AS Oct. 93, p381-393.

Optimal Hybridization of Symmetric, Cross-Ply Laminates Against Buckling, Sarp Adali and Kevin J. Duffy, AS Oct. 93, p394-406.

Computation

Multiple-Zone Potential Solution around Wing-Body Configurations, M. M. Alishahi and M. Darbandi, AS Oct. 93, p329-346.

Stability and Strength of Rigid and Semirigid Plane Frameworks, Salah E. Mohamed and George J. Simitses, AS Apr. 93, p186-198.

Computer analysis

High-Performance Computing in Structural Mechanics and Engineering, Hojjat Adeli, M. P. Kamat, Girish Kulkarni and R. D. Vanluchene, AS July 93, p249-267.

Computer applications

High-Performance Computing in Structural Mechanics and Engineering, Hojjat Adeli, M. P. Kamat, Girish Kulkarni and R. D. Vanluchene, AS July 93, p249-267.

Multiple-Zone Potential Solution around Wing-Body Configurations, M. M. Alishahi and M. Darbandi, AS Oct. 93, p329-346.

Construction

Position-Force Adaptive Control for Construction Robots, Y. Zhou and Miroslaw J. Skibniewski, AS Apr. 93, p167-185.

Prototype Robotic Masonry System, Frank Altobelli, Henry F. Taylor and Leonhard E. Bernold, AS Jan. 93, p19-33.

Construction equipment

Lunar-Base Construction Equipment and Methods Evaluation, Walter W. Boles, David B. Ashley and Richard L. Tucker, AS July 93, p217-235.

Construction methods

Lunar-Base Construction Equipment and Methods Evaluation, Walter W. Boles, David B. Ashley and Richard L. Tucker, AS July 93, p217-235.

Control

Position-Force Adaptive Control for Construction Robots, Y. Zhou and Miroslaw J. Skibniewski, AS Apr. 93, p167-185.

Control equipment

Structure/Control Synthesis with Nonnegligible Actuator Mass, David C. Zimmerman, AS Jan. 93, p76-89.

Control systems

Dynamic Model of Excavator, P. K. Vähä and M. J. Skibniewski, AS Apr. 93, p148-158.

Motion and Path Control for Robotic Excavation, Leonhard E. Bernold, AS Jan. 93, p1-18.

Structure/Control Synthesis with Nonnegligible Actuator Mass, David C. Zimmerman, AS Jan. 93, p76-89.

Creep

Probabilistic Material Degradation Under High Temperature, Fatigue, and Creep, L. Boyce, AS Oct. 93, p347-362.

Damage

Effect of Localized Bending at Through-Flaws in Pressurized Composite Cylinders, Kevin J. Saeger and Paul A. Lagace, AS Oct. 93, p381-393.

Damage assessment

Damage Detection in Composite Materials Using Identification Techniques, F. J. Soeiro and P. Hajela, AS Oct. 93, p363-380.

Damping

Review of Methods for Analyzing Constrained-Layer Damped Structures, J. B. Kosmatka and S. L. Liguore, AS July 93, p268-283.

Data collection

Motion and Path Control for Robotic Excavation, Leonhard E. Bernold, AS Jan. 93, p1-18.

Decision making

Motion and Path Control for Robotic Excavation, Leonhard E. Bernold, AS Jan. 93, p1-18.

Deformation

Observations on Higher-Order Beam Theory, A. Bhimaraddi and K. Chandrashekhara, AS Oct. 93, p408-413.

Structural and Orbital Conditions on Response of Large Space Structures, Ramesh B. Malla, AS Apr. 93, p115-132.

Degradation

Probabilistic Material Degradation Under High Temperature, Fatigue, and Creep, L. Boyce, AS Oct. 93, p347-362.

Delaminating

Delamination Effect on Flutter of Homogeneous Laminated Plates, Le-Chung Shiau, AS July 93, p284-298.

Design

Multiple-Zone Potential Solution around Wing-Body Configurations, M. M. Alishahi and M. Darbandi, AS Oct. 93, p329-346.

Displacement

Observations on Higher-Order Beam Theory, A. Bhimaraddi and K. Chandrashekhara, AS Oct. 93, p408-413.

Dynamic models

Cognitive Force Control of Excavators, P. K. Vähä and M. J. Skibniewski, AS Apr. 93, p159-166.

Dynamic Model of Excavator, P. K. Vähä and M. J. Skibniewski, AS Apr. 93, p148-158.

Dynamic response

Structural Response of 34-m Darrieus Rotor to Turbulent Winds, D. J. Malcolm, AS Jan. 93, p55-75.

Evolution, development

Integrated Genetic Algorithm for Optimization of Space Structures, Hojjat Adeli and Nai-Tsang Cheng, AS Oct. 93, p315-328.

Excavation
Cognitive Force Control of Excavators, P. K. Vähä and M. J. Skibniewski, AS Apr. 93, p159-166.

Dynamic Model of Excavator, P. K. Vähä and M. J. Skibniewski, AS Apr. 93, p148-158.

Motion and Path Control for Robotic Excavation, Leonhard E. Bernold, AS Jan. 93, p1-18.

Fatigue
Probabilistic Material Degradation Under High Temperature, Fatigue, and Creep, L. Boyce, AS Oct. 93, p347-362.

Fiber reinforced materials
Improved Method for Determining Interfacial Stresses in Composites, Ai-Kah Soh, AS Jan. 93, p90-103.

Finite difference method
Effect of Localized Bending at Through-Flaws in Pressurized Composite Cylinders, Kevin J. Saeger and Paul A. Lagace, AS Oct. 93, p381-393.

Thermal Stresses in Spherical Shells, Jianping Pei and Issam E. Harik, AS Jan. 93, p106-110.

Finite element method
Delamination Characteristics around Hole in Laminates with Softening Strip, D. K. Shah and W. S. Chan, AS Apr. 93, p199-215.

Improved Method for Determining Interfacial Stresses in Composites, Ai-Kah Soh, AS Jan. 93, p90-103.

Finite elements
Review of Methods for Analyzing Constrained-Layer Damped Structures, J. B. Kosmatka and S. L. Liguore, AS July 93, p268-283.

Flexibility
Structural and Orbital Conditions on Response of Large Space Structures, Ramesh B. Malla, AS Apr. 93, p115-132.

Flexible connections
Stability and Strength of Rigid and Semirigid Plane Frameworks, Salah E. Mohamed and George J. Simitses, AS Apr. 93, p186-198.

Flutter
Delamination Effect on Flutter of Homogeneous Laminated Plates, Le-Chung Shiau, AS July 93, p284-298.

Force
Position-Force Adaptive Control for Construction Robots, Y. Zhou and Miroslaw J. Skibniewski, AS Apr. 93, p167-185.

Frames
Stability and Strength of Rigid and Semirigid Plane Frameworks, Salah E. Mohamed and George J. Simitses, AS Apr. 93, p186-198.

Holes
Delamination Characteristics around Hole in Laminates with Softening Strip, D. K. Shah and W. S. Chan, AS Apr. 93, p199-215.

Identification
Damage Detection in Composite Materials Using Identification Techniques, F. J. Soeiro and P. Hajela, AS Oct. 93, p363-380.

Interfaces
Improved Method for Determining Interfacial Stresses in Composites, Ai-Kah Soh, AS Jan. 93, p90-103.

Laminates
Delamination Characteristics around Hole in Laminates with Softening Strip, D. K. Shah and W. S. Chan, AS Apr. 93, p199-215.

Optimal Hybridization of Symmetric, Cross-Ply Laminates Against Buckling, Sarp Adali and Kevin J. Duffy, AS Oct. 93, p394-406.

Laminating
Delamination Effect on Flutter of Homogeneous Laminated Plates, Le-Chung Shiau, AS July 93, p284-298.

Launching pads
Use Value Engineering Concepts for Spaceport Launching, Richard A. Kaden, AS Apr. 93, p133-147.

Least squares method
Improved Method for Determining Interfacial Stresses in Composites, Ai-Kah Soh, AS Jan. 93, p90-103.

Masonry
Prototype Robotic Masonry System, Frank Altobelli, Henry F. Taylor and Leonhard E. Bernold, AS Jan. 93, p19-33.

Materials
Probabilistic Material Degradation Under High Temperature, Fatigue, and Creep, L. Boyce, AS Oct. 93, p347-362.

Mathematical models
Lunar-Base Construction Equipment and Methods Evaluation, Walter W. Boles, David B. Ashley and Richard L. Tucker, AS July 93, p217-235.

Methodology
Review of Methods for Analyzing Constrained-Layer Damped Structures, J. B. Kosmatka and S. L. Liguore, AS July 93, p268-283.

Microwave sensors
Technology Assessment and Development of Large Deployable Antennas, C. A. Rogers, W. L. Stutzman, T. G. Campbell and J. M. Hedgepeth, AS Jan. 93, p34-54.

Mobility
Use Value Engineering Concepts for Spaceport Launching, Richard A. Kaden, AS Apr. 93, p133-147.

Modeling
Probabilistic Material Degradation Under High Temperature, Fatigue, and Creep, L. Boyce, AS Oct. 93, p347-362.

Modular structures
Use Value Engineering Concepts for Spaceport Launching, Richard A. Kaden, AS Apr. 93, p133-147.

Moon
Lunar-Base Construction Equipment and Methods Evaluation, Walter W. Boles, David B. Ashley and Richard L. Tucker, AS July 93, p217-235.

Motion
Motion and Path Control for Robotic Excavation, Leonhard E. Bernold, AS Jan. 93, p1-18.

Motion effects
Structural and Orbital Conditions on Response of Large Space Structures, Ramesh B. Malla, AS Apr. 93, p115-132.

Nonlinear programming
Structure/Control Synthesis with Nonnegligible Actuator Mass, David C. Zimmerman, AS Jan. 93, p76-89.

Notch effect
Effect of Localized Bending at Through-Flaws in Pressurized Composite Cylinders, Kevin J. Saeger and Paul A. Lagace, AS Oct. 93, p381-393.

Numerical analysis
Review of Methods for Analyzing Constrained-Layer Damped Structures, J. B. Kosmatka and S. L. Liguore, AS July 93, p268-283.

Optimal design
Optimal Hybridization of Symmetric, Cross-Ply Laminates Against Buckling, Sarp Adali and Kevin J. Duffy, AS Oct. 93, p394-406.

Structure/Control Synthesis with Nonnegligible Actuator Mass, David C. Zimmerman, AS Jan. 93, p76-89.

Optimization
Integrated Genetic Algorithm for Optimization of Space Structures, Hojjat Adeli and Nai-Tsang Cheng, AS Oct. 93, p315-328.

Optimization models
Damage Detection in Composite Materials Using Identification Techniques, F. J. Soeiro and P. Hajela, AS Oct. 93, p363-380.

orbits
Structural and Orbital Conditions on Response of Large Space Structures, Ramesh B. Malla, AS Apr. 93, p115-132.

Plates
Delamination Effect on Flutter of Homogeneous Laminated Plates, Le-Chung Shiau, AS July 93, p284-298.

Potential flow
Multiple-Zone Potential Solution around Wing-Body Configurations, M. M. Alishahi and M. Darbandi, AS Oct. 93, p329-346.

Prefabrication
Prototype Robotic Masonry System, Frank Altobelli, Henry F. Taylor and Leonhard E. Bernold, AS Jan. 93, p19-33.

Pressure vessels
Effect of Localized Bending at Through-Flaws in Pressurized Composite Cylinders, Kevin J. Saeger and Paul A. Lagace, AS Oct. 93, p381-393.

Pressures
System Flexibility and Reflected Pressures, Avinash C. Singhal, Kevin S. Fansler and Mostafa Toossi, AS July 93, p299-313.

Processing
High-Performance Computing in Structural Mechanics and Engineering, Hojjat Adeli, M. P. Kamat, Girish Kulkarni and R. D. Vanluchene, AS July 93, p249-267.

Reflection
System Flexibility and Reflected Pressures, Avinash C. Singhal, Kevin S. Fansler and Mostafa Toossi, AS July 93, p299-313.

Remote sensing
Technology Assessment and Development of Large Deployable Antennas, C. A. Rogers, W. L. Stutzman, T. G. Campbell and J. M. Hedgepeth, AS Jan. 93, p34-54.

Rigidity
Thermal Stresses in Spherical Shells, Jianping Pei and Issam E. Harik, AS Jan. 93, p106-110.

Robotics
Cognitive Force Control of Excavators, P. K. Vähä and M. J. Skibniewski, AS Apr. 93, p159-166.

Dynamic Model of Excavator, P. K. Vähä and M. J. Skibniewski, AS Apr. 93, p148-158.

Motion and Path Control for Robotic Excavation, Leonhard E. Bernold, AS Jan. 93, p1-18.

Position-Force Adaptive Control for Construction Robots, Y. Zhou and Miroslaw J. Skibniewski, AS Apr. 93, p167-185.

Prototype Robotic Masonry System, Frank Altobelli, Henry F. Taylor and Leonhard E. Bernold, AS Jan. 93, p19-33.

Sensitivity analysis
Statistical Sensitivity Analysis of Lattice Space Structures, Hiroshi Furuya, AS July 93, p236-248.

Sensors
Motion and Path Control for Robotic Excavation, Leonhard E. Bernold, AS Jan. 93, p1-18.

Shear strain
Observations on Higher-Order Beam Theory, A. Bhimaraddi and K. Chandrashekhara, AS Oct. 93, p408-413.

Space structures
Integrated Genetic Algorithm for Optimization of Space Structures, Hojjat Adeli and Nai-Tsang Cheng, AS Oct. 93, p315-328.

Statistical Sensitivity Analysis of Lattice Space Structures, Hiroshi Furuya, AS July 93, p236-248.

Structural and Orbital Conditions on Response of Large Space Structures, Ramesh B. Malla, AS Apr. 93, p115-132.

Technology Assessment and Development of Large Deployable Antennas, C. A. Rogers, W. L. Stutzman, T. G. Campbell and J. M. Hedgepeth, AS Jan. 93, p34-54.

Spacecraft
Use Value Engineering Concepts for Spaceport Launching, Richard A. Kaden, AS Apr. 93, p133-147.

Spacecraft launching sites
Use Value Engineering Concepts for Spaceport Launching, Richard A. Kaden, AS Apr. 93, p133-147.

Spherical shells
Thermal Stresses in Spherical Shells, Jianping Pei and Issam E. Harik, AS Jan. 93, p106-110.

Spraying
Position-Force Adaptive Control for Construction Robots, Y. Zhou and Miroslaw J. Skibniewski, AS Apr. 93, p167-185.

Strength
Probabilistic Material Degradation Under High Temperature, Fatigue, and Creep, L. Boyce, AS Oct. 93, p347-362.

Stability and Strength of Rigid and Semirigid Plane Frameworks, Salah E. Mohamed and George J. Simitses, AS Apr. 93, p186-198.

Stress
Delamination Characteristics around Hole in Laminates with Softening Strip, D. K. Shah and W. S. Chan, AS Apr. 93, p199-215.

Improved Method for Determining Interfacial Stresses in Composites, Ai-Kah Soh, AS Jan. 93, p90-103.

Structural analysis
High-Performance Computing in Structural Mechanics and Engineering, Hojjat Adeli, M. P. Kamat, Girish Kulkarni and R. D. Vanluchene, AS July 93, p249-267.

Structural behavior
Review of Methods for Analyzing Constrained-Layer Damped Structures, J. B. Kosmatka and S. L. Liguore, AS July 93, p268-283.

Structural design
Statistical Sensitivity Analysis of Lattice Space Structures, Hiroshi Furuya, AS July 93, p236-248.

Structural engineering
High-Performance Computing in Structural Mechanics and Engineering, Hojjat Adeli, M. P. Kamat, Girish Kulkarni and R. D. Vanluchene, AS July 93, p249-267.

System Flexibility and Reflected Pressures, Avinash C. Singhal, Kevin S. Fansler and Mostafa Toossi, AS July 93, p299-313.

Structural response
Structural and Orbital Conditions on Response of Large Space Structures, Ramesh B. Malla, AS Apr. 93, p115-132.

Structures
Structure/Control Synthesis with Nonnegligible Actuator Mass, David C. Zimmerman, AS Jan. 93, p76-89.

Systems
Damage Detection in Composite Materials Using Identification Techniques, F. J. Soeiro and P. Hajela, AS Oct. 93, p363-380.

Technology assessment
Technology Assessment and Development of Large Deployable Antennas, C. A. Rogers, W. L. Stutzman, T. G. Campbell and J. M. Hedgepeth, AS Jan. 93, p34-54.

Temperature effects
Probabilistic Material Degradation Under High Temperature, Fatigue, and Creep, L. Boyce, AS Oct. 93, p347-362.

Theories
Observations on Higher-Order Beam Theory, A. Bhimaraddi and K. Chandrashekhara, AS Oct. 93, p408-413.

Thermal stresses
Thermal Stresses in Spherical Shells, Jianping Pei and Issam E. Harik, AS Jan. 93, p106-110.

Trusses
Integrated Genetic Algorithm for Optimization of Space Structures, Hojjat Adeli and Nai-Tsang Cheng, AS Oct. 93, p315-328.

Statistical Sensitivity Analysis of Lattice Space Structures, Hiroshi Furuya, AS July 93, p236-248.

Turbines
Structural Response of 34-m Darrieus Rotor to Turbulent Winds, D. J. Malcolm, AS Jan. 93, p55-75.

Turbulent flow
Structural Response of 34-m Darrieus Rotor to Turbulent Winds, D. J. Malcolm, AS Jan. 93, p55-75.

Uncertainty analysis
Probabilistic Material Degradation Under High Temperature, Fatigue, and Creep, L. Boyce, AS Oct. 93, p347-362.

Uncertainty principles
Lunar-Base Construction Equipment and Methods Evaluation, Walter W. Boles, David B. Ashley and Richard L. Tucker, AS July 93, p217-235.

Value engineering
Use Value Engineering Concepts for Spaceport Launching, Richard A. Kaden, AS Apr. 93, p133-147.

Vibration
Review of Methods for Analyzing Constrained-Layer Damped Structures, J. B. Kosmatka and S. L. Liguore, AS July 93, p268-283.

Wind
Structural Response of 34-m Darrieus Rotor to Turbulent Winds, D. J. Malcolm, AS Jan. 93, p55-75.
